

Purpose: Web site to establish a small business called Random Island

Description: The landing page will link to three main areas: Books, Jewelry & Collectibles, and Professional Services. My client wants to link Books to her Amazon page and Jewelry & Collectibles to her eBay store. Professional Services will link each icon and Learn More to an additional page for more information and to Request Services. She also wanted to list her favorite charities on her page. I added the contact form on the page for comments or to request services.

She also chose the colors green, purple, and gold (Mardi Gras colors). I searched Google Materials for the best Web colors to meet her requirement. She also did not want sans serif fonts so I chose a Google Font called Noto which is a serif font.

This nav area would be transparent and remain stationerywhen scrolling down the page.

3 rotating images that actually extend up under nav area above. Or, a video of seagulls flying over the island.

The image at the left will have a transparent background that floats over the green background.

The image at the right will have a transparent background that floats over the purple background.

Services could have an icon associated with it that links to a separate area on the Services page.

Charities would have their logo and link to their site below it.

This area would help build a contact list and get comments from your followers or ask questions about your services. This might be better just on the Services page.

The footer would have incidental information that every site has. If you have social media links like twitter or LinkedIn we can put them here.
